

# Pro Sentinel Series

## Pro Ducted Split Cooling Systems

Protect your wine investment. Wine Guardian's Sentinel Series units are the **strongest and most energy-efficient** wine cellar cooling systems on the market. They provide **optimal temperature and humidity control** for both commercial and residential cellars with a design that allows for easy installation and service. The Pro Ducted systems are ideal for low-temperature air conditioning (52-70°F/11-21°C). Some applications include wine storage, document preservation, instrument storage, and long-term food storage.

Ducted Split systems are ideal for wine cellars with little to no extra space for a self-contained Wine Guardian system. An optional humidifier can be installed with the ability to achieve 55-65% relative humidity. For more information about our unit specifications, view our specification sheet.

- 1 **Versatile**  
Can be installed in a variety of locations
- 2 **Bold**  
A stylish and contoured look for modern homes
- 3 **Efficient**  
Fully insulated cabinet and duct collars for protection in the most demanding environments
- 4 **Comprehensive**  
24-volt electronics allow for simple integration with smart homes or commercial building management systems
- 5 **Strong**  
The most durable wine cooling system on the market
- 6 **Accessible**  
Innovative multi-panel design with integral fasteners for easy service and maintenance

\*Patent Pending

# Wine is your passion. *Preserving it is ours.*

## Versatile

The ducted split systems are our **most flexible** units. These systems give you the ability to install the fan coil and condensing unit in a variety of locations. They are ideal for cellars that have limited space, applications where venting is difficult, and cellars that require longer than recommended duct runs.

## Bold

A **sleek and modern look** to compliment any wine cellar design.

## Efficient

The Pro Ducted system chassis features up to **three times more insulation** than previous versions. New stronger, double wall insulated duct collars insulate 42% more to help reduce temperature loss and condensation even in the most demanding environments.

## Versatile

Our cooling systems offer a **wide range of control**, so you can match our units to your specific needs. Wine Guardian Pro systems use 24-volt electronics for easy integration with your existing smart home or commercial building management system.

## Strong

The Sentinel Series is made of the highest UL rated composite material, features an all aluminum chassis, and contains coated coils to ensure **product durability**. It is five times stronger than our previous model. The unit's construction prevents dents and scratches from installation and shipping.

## Accessible

Composite multi-panel design with integral captive quarter-turn fasteners allows for **ease of access** and serviceability. Interchangeable duct collars and solid panels can be simply configured during installation.

## Options and Accessories:

- Electric Heat Option
- Extreme Climate Protection Option
- Remote control, monitoring and sensing
- Duct kits and grilles
- Humidification
- Extended warranties

\*Not all options are available for all units. Contact a distributor for more information.

## Service Simplified

Wine Guardian Pro units come installed with service ports, appropriate pressure switches, and a refrigerant sight glass to allow for **faster and more efficient maintenance**.

Optional Integrated Humidifier
