

LUXURY WINE CABINETS

Take the next step in ultimate wine preservation.

Wine Guardian Wine Cabinets by La Sommelière are a perfect solution for wine collectors who want extra wine storage in a kitchen, living room, or other convenient location. These wine cabinets are fully self-contained systems designed to store wine at either long-term preservation or serving temperatures.

Available in two sizes, Wine Guardian is the only cabinet manufacturer that allows for personalization of the type of shelving and their placement in the cabinet — just the way you like it.

Wine Guardian cabinets are handcrafted by expert European wine cabinet manufacturers. All cabinets are fully assembled in our factory and are ready to set up right out of the box.

CONFIGURABLE *WINE CABINET*

Using the Wine Guardian designed cabinet configuration tool on wineguardian.com, simply select the cabinet, then mix-and-match six (6) different shelving types and their placement within the cabinet.

There are thousands of possible cabinet configurations – making these cabinets truly unique to you and your collection.

FEATURES & *BENEFITS*

SINGLE- OR MULTI-ZONE TECHNOLOGY: The Single-Zone wine cabinet can preserve wine at ideal temperatures between 55° - 64°F (13° - 18°C) or serving temperatures between 46° - 54°F (8° - 12°C).

The Multi-Zone cabinet features polyvalent technology that allows it to create three separate temperature zones within the cabinet, optimal for storing different types of wine that have different ideal preservation temperatures.

IDEAL HUMIDITY CONDITIONS: The cabinet automatically maintains humidity conditions between 55 and 65% relative humidity for optimal long-term storage of fine wines.

CHARCOAL FILTER: To keep the cabinet odor free, these systems are equipped with an air refreshing system with an activated charcoal filter.

AUTOMATIC DEFROST: When the cooling cycle is finished, the refrigerated parts of the cabinet are defrosted automatically.

UV LIGHT PROTECTION: The glass door was treated to filter up to 70% of harmful UV rays.

DOOR LOCK: Simple-to-use lock keeps your wine out of reach of children.

VIBRATION FREE DESIGN: Shock absorbers and thick insulation foam help absorb the vibrations from the internal mechanical equipment, protecting your wine.
